Product Overview

Industrial Slitting & Cut-to-Length System

This high-performance machine is engineered for the efficient processing of pre-painted and galvanized steel coils. Featuring an advanced PLC control system, it provides precise slitting and cutting capabilities suitable for various metalworking applications. Its robust design ensures consistent performance and high-speed operation, making it an ideal choice for building material manufacturing.

Technical Specifications

Material Handling

Parameter	Specification
Compatible Materials	Pre-painted & Galvanized steel
Thickness Range	0.2 - 1.5 mm
Yield Stress	Q235-345 Mpa

Core Components

PLC, Engine, Motor

Performance & Metrics

Physical Dimensions

500 kg

Gross Weight

Service & Support

Warranty Terms

- 1 Year Warranty on machine
- 1 Year Warranty on core components

After-sales Support

Free spare parts, Online support, Field installation, Commissioning and training, Video technical support, Overseas field service

Quality & Standards

Certifications & Testing

CE Certified • Machinery Test Report Provided • Video Outgoing-inspection Provided
