Product Overview

Professional Grade Splitting Wedges

These high-carbon steel splitting wedges are engineered for high-impact performance in forestry and woodworking applications. Featuring a hardened striking face and a precision-tapered body, they ensure efficient wood splitting and log processing. The durable construction is built to withstand repeated use, making them a reliable choice for both professional and home-based splitting tasks.

Technical Specifications

Model Variants

- SM04
- SM09
- SM13

Material	High-carbon steel
Finish	Black corrosion-resistant coating

Key Features

Primary Applications

Forestry • Woodworking • Log splitting • Firewood preparation

Product Highlights	Hardened striking face, Tapered body design, Corrosion resistant, High impact strength
