

# Steel Stock Bore Sprocket with 21 Teeth

This steel stock bore sprocket is designed with 21 teeth for efficient power transfer. It is compatible with 100/1.25" chains and features a B style configuration.

## Product Overview

### Industrial Steel Sprocket

This 100B21 steel stock bore sprocket is engineered for reliable power transmission in demanding industrial environments. Featuring 21 precision-cut teeth and a robust B-style configuration, this component is designed to accommodate 100/1.25" chain systems. Its welded construction and versatile bore capacity make it a durable choice for heavy-duty machinery applications.

## Technical Specifications

Number of Teeth	21
Chain Pitch	1.25 inch
Bore Size Range	1.313" to 3"
Hub OD	4.5 in
Length Through Bore	2 in
Tooth Thickness	0.692 in
Pitch Diameter	8.387 in

## Construction & Features

Style	B Style (Hub Extension)
Material	Steel
Hardened Teeth	No
Construction	Welded

## Condition

Condition Notes	Not in original box, Minor scratches, Great condition
