

Steel Strap Pulley for Load-Bearing Applications

These steel strap pulleys are designed for load-bearing applications. Their durable steel construction and mounting strap ensure secure attachment in lifting, rigging, and mechanical systems.

Product Overview

Industrial Steel Strap Pulleys

These steel strap pulleys are engineered for robust performance in diverse load-bearing applications, including lifting and rigging mechanical systems. Constructed from durable steel, each unit features an integrated mounting strap to ensure secure attachment during operation. They are specifically designed to minimize friction and wear on ropes and cables, promoting smooth, efficient mechanical movement.

Technical Specifications

Ideal Applications

- Lifting systems
- Rigging operations
- Mechanical power transmission

Model Numbers	P2152, P2154, P2252, P2253, P2254
Primary Material	High-durability steel
