

Steel Tube Grinding Wheel

This grinding wheel is designed for cutting and grinding steel tubes. It features a durable abrasive composition for efficient material removal and extended wheel life.

Product Overview

High-Performance Steel Tube Grinding

This grinding wheel is engineered for efficient material removal on steel tubes, ensuring professional results in industrial applications. Built for safety and longevity, it offers a robust abrasive composition compatible with standard angle grinders. The product strictly adheres to international quality and safety benchmarks, making it a reliable choice for demanding metalworking environments.

Technical Specifications

Dimensions	100mm x 6mm x 22.23mm
Maximum Operating Speed	80 m/s
Maximum RPM	15300
Abrasive Grade	A24R-BF27

Compliance and Safety

Safety Instructions

- Handle with care to avoid accidents
- Always use safety guards
- Consult user manual before operation
- Never exceed maximum speed

Certifications	EN 12413, ISO 9001, ANSI B7.1
