

# Steel Vehicle Service Ramps

These heavy-duty vehicle ramps are constructed from durable steel for safely raising vehicles. The ramps provide a secure platform for working under vehicles, ideal for automotive maintenance and repair.

## ADDITIONAL IMAGES

## Product Overview

### Professional Grade Vehicle Service Ramps

These heavy-duty steel vehicle ramps are designed to provide a stable, elevated platform for essential automotive maintenance, including oil changes and undercarriage inspections. Constructed from durable steel with a corrosion-resistant red powder-coated finish, the ramps ensure long-term reliability in demanding environments. Featuring a textured surface for superior tire grip and a gradual incline for easy ascent, these ramps offer a safe and professional solution for both technicians and automotive enthusiasts.

## Technical Specifications

Material	Heavy-duty steel
Finish	Red powder-coated
Safety Features	Textured grip surface, Non-slip design, Corrosion resistance

## Usage and Handling

### Primary Applications

- Oil changes
- Undercarriage inspections
- Routine maintenance
- Vehicle lifting for repair

Handling	Yes
