Overview

Heavy-Duty Steel Wire Brush

This professional-grade steel wire brush is engineered for high-performance cleaning, descaling, and deburring of both metal and non-metal surfaces. Featuring copper-coated steel wire and a durable ergonomic handle, it provides an effective solution for removing stubborn rust, paint, welding slag, and heavy stains. The design prioritizes user comfort and efficiency, making it an essential tool for industrial maintenance and surface preparation tasks.

Key Metrics

Performance Metrics

0.3 mm

Wire Diameter

250 mm

Total Length

Dimensions

Detailed Dimensions

Component	Measurement (Metric)	Measurement (Imperial)
Total Length	250 mm	9.5"
Brush Head Length	135 mm	5.3"
Brush Width/Height	50 mm	2.2"
Handle Length	101 mm	4"
Handle Height	32 mm	1.25"

Material & Build

Bristle Material	Copper Coated Steel Wire
Handle Material	Polypropylene (PP) Plastic
Handle Features	Ergonomic Grip, Hook Design, Easy Storage, Power Saving Design

Applications

Primary Applications

- Rust and Paint Removal
- Cleaning Welding Slag
- Descaling Metal Surfaces
- Grinding and Deburring
- Removing Wood Residue
- Heavy Stain Cleaning
- Non-metal Surface Residue Removal

Duty Rating

Heavy Duty Scrubbing • Professional Grade
