Product Overview

Versatile Storage & Transport Solution

This steel wire mesh roll cage container is a robust and efficient solution designed for supermarkets, warehouses, and industrial environments. Its durable steel wire construction provides excellent support and ventilation, while the mesh design allows for easy visual inspection of contents. Equipped with swivel casters for smooth maneuverability and a collapsible, stackable frame, this container optimizes space and streamlines logistics.

Key Features

Design Capabilities

- Hinged gate for easy access
- Collapsible design for space-saving
- Stackable for efficient storage
- Swivel casters for mobility

Material & Finish

Steel Wire Mesh, Galvanized Finish, Corrosion Resistant
