Product Overview

Premium Steel Wire Reinforced Rubber Seal

This high-performance rubber seal combines solid foaming construction with integrated steel wire reinforcement to provide superior sealing and structural integrity. Engineered for automotive and industrial enclosures, it offers exceptional resistance to weather, ozone, and temperature extremes. The specialized profile ensures a secure, airtight fit that effectively prevents water, dust, and noise intrusion.

Technical Specifications

Reinforcement	Steel Wire
Material Characteristics	Solid Foaming, Rubber, Weather Resistant, Ozone Resistant

Performance Features

Core Benefits

- Enhanced noise reduction
- High structural integrity
- Prevents deformation under pressure
- Excellent sealing against water and air
- Tight and reliable fit

Applications

Typical Applications

Automotive Doors • Automotive Windows • Industrial Enclosures
