

Steering and Transmission Assembly Components

This assembly features various components including the brake disc, wheel hub, and ABS sensor. It provides structural support and facilitates the connection between steering and transmission systems.

Product Overview

Steering and Transmission Assembly Components

This high-precision assembly set includes all critical components for vehicle steering and transmission systems. Designed for durability and performance, it features components ranging from brake discs and wheel hubs to sophisticated ABS sensors and steering knuckles. These parts work in seamless harmony to ensure optimal vehicle safety and handling stability under various road conditions.

Technical Components

Included Components

- Brake Disc
- Dust Cover
- Wheel Hub Nut
- Brake Caliper
- Steering Knuckle
- ABS Sensor
- Damping Beam Assembly
- Ball Joint
- Brake Lines
- Parking Brake Cable

Assembly Details

System Integration

Steering System, Transmission System, Braking System, Rear Axle System
