

Steering Linkage Pitman Arm

This steering linkage component is a pitman arm. It features a ball joint, a splined hole for attachment to the steering box, and a connecting arm.

Product Overview

Steering Linkage Pitman Arm

This steering linkage pitman arm is engineered for precise vehicle control and steering system integrity. Designed as a direct replacement part, it facilitates the critical transfer of motion from the steering box to the linkage system. Constructed from durable forged steel, this component ensures reliability and robust performance for compatible classic vehicle models.

Technical Specifications

Construction

Forged Steel • Black Finish

OEM Reference

45401-19195

Part Identification

SP-2355

Compatibility

Model Codes

- AE70
- TE70

Compatible Vehicles

COROLLA, SPRINTER

Manufacturing Years

1979-1981
