

Steering Wheel Lock

This robust security device is designed to deter vehicle theft by immobilizing the steering wheel. It features a key-activated locking mechanism and a padded grip to prevent damage to the steering wheel.

Product Overview

Robust Vehicle Security

The Baseball Lock is a reliable security device engineered to immobilize a vehicle's steering wheel, effectively deterring theft. Constructed from durable materials, this lock acts as a strong physical barrier against unauthorized use. Its high-visibility color scheme serves as an immediate visual deterrent to potential intruders, while the user-friendly design ensures quick and convenient installation.
