

Step Drill Bit

This step drill bit is designed to drill multiple hole sizes with a single bit. Its twist design ensures efficient chip evacuation, reducing heat and friction during drilling.

Product Overview

Professional Grade Step Drill Bits

These high-performance step twist drills are engineered for precision and efficiency across multiple materials including metal, wood, and plastic. The unique multi-step design enables users to drill various hole diameters using a single tool, streamlining workflows and reducing tool changes. Constructed from durable high-speed steel, the bits feature a specialized twist geometry that optimizes chip evacuation and minimizes heat buildup during operation.

Technical Specifications

Material	High-Speed Steel (HSS)
Available Types	Straight Shank, Taper Shank, Step Core, Two-Fluted, Four-Fluted, Multi-Step

Applications

Compatible Materials

- Metal
- Wood
- Plastic

Ideal For

Professional Applications • DIY Projects
