

Step Drill Bit Set

This step drill set features a hex shank for secure chucking and is designed for creating holes of varying sizes in thin materials. The drills are fully ground from high-speed steel (HSS) and feature a tin-coated surface treatment for enhanced durability and wear resistance.

Product Overview

High-Performance Step Drill Set

This professional-grade step drill bit set is designed for precision hole creation in thin materials. Fully ground from high-speed steel (HSS) and finished with a durable titanium nitride (TiN) coating, these bits offer excellent wear resistance and longevity. The set features versatile hex shanks for secure chucking, making them an ideal choice for a variety of drilling applications.

Technical Specifications

Surface Coating

TiN-Coated

Material

High-Speed Steel (HSS)

Available Shank Radii

1/4", 3/8", 1/2"

Drill Bit Dimensions

Drill Bit Specifications

Hole Range	Steps	Shank Diameter	Step Thickness
