

Step-Through Electric Folding Bicycle

This folding electric bicycle features a lightweight frame and a step-through design. It is equipped with front and rear fenders and a rear rack.

Product Overview

Designed for Urban Mobility

This step-through electric folding bicycle combines convenience with durable construction, making it an ideal choice for urban commuting. Its lightweight aluminum alloy frame and folding design allow for easy storage and transport in compact spaces. Equipped with puncture-resistant tires and a suspension fork, it offers a smooth and reliable ride on city streets.
