

# Step-Through Frame City Bicycle

This step-through frame bicycle is designed for comfortable riding in urban environments. It features full fenders, whitewall tires, and swept-back handlebars for an upright riding position.

## Overview

### Comfort-Focused City Commuter

This step-through frame city bicycle is engineered for urban mobility and rider comfort. Featuring an upright riding position thanks to swept-back handlebars, it ensures a relaxed experience for daily commuting. The design includes practical elements such as full fenders for weather protection and a protective chain guard, making it a reliable choice for city environments.
