

Step-Through Frame City Bicycle

This is a step-through frame city bicycle designed for comfortable and convenient urban commuting. It features full fenders, a rear rack, and an upright riding position.

Overview

Urban Commuting Redefined

This step-through frame city bicycle is engineered for comfortable and convenient daily commuting. Its design prioritizes accessibility with a low frame for easy mounting, while the upright riding position ensures excellent visibility and posture. Equipped with practical features like full fenders and a rear rack, it is a reliable, low-maintenance solution for navigating paved city streets.
