

Step-Through Frame Electric Bicycle with All-Terrain Tires

This electric bicycle is designed with a step-through frame for easy access. It features a rear rack for carrying items and all-terrain tires for versatile riding.

Product Overview

Versatile Step-Through Electric Bicycle

This electric bicycle features an accessible step-through frame design, engineered for easy mounting and dismounting in urban or recreational settings. Equipped with all-terrain tires and front suspension, it offers a comfortable ride across varied surfaces. The integrated front-hub motor and frame-mounted battery ensure a balanced ride, while practical additions like a rear cargo rack and fenders make it a capable solution for daily commuting or light utility tasks.
