

Step-Through Frame Motorcycle for Urban Commuting

This motorcycle features a step-through frame design ideal for urban commuting. It is equipped with a single-cylinder engine, chrome exhaust system, and rear carrier with a backrest.

Overview

Urban Commuter Motorcycle

Designed specifically for efficient urban commuting and short-distance travel, this motorcycle features an accessible step-through frame design that prioritizes rider convenience. It is equipped with a reliable single-cylinder engine and classic aesthetic elements, including a chrome exhaust system and spoked wheels. The inclusion of a practical rear carrier with a backrest makes it an ideal solution for daily city transport needs.
