

Step-Through Frame Mountain Bike

This mountain bike features a step-through frame design. Front suspension forks provide enhanced shock absorption on uneven terrain.

Overview

Versatile Step-Through Mountain Bike

This mountain bike features a convenient step-through frame design, making it highly accessible for recreational riding and daily commuting. Equipped with front suspension forks, it delivers reliable shock absorption to handle uneven terrain with ease. The drivetrain includes a versatile gear system with both front and rear derailleurs, ensuring optimal performance across a wide range of riding conditions.
