

# Stepless Variator with Worm Gear Reducer

This product combines a UD stepless variator and an NMRW worm gear reducer. It provides variable speed control and high torque output for industrial applications.

## Product Overview

### Industrial Variable Speed Solution

This high-quality assembly combines a UD stepless variator with an NMRW worm gear reducer to deliver exceptional versatility. The unit facilitates smooth, continuous output speed adjustment while maintaining robust torque delivery through the worm gear stage. It serves as an ideal solution for industrial environments requiring precise speed control paired with reliable, high-efficiency power transmission.

## Technical Specifications

### Primary Components

- UD Stepless Variator
- NMRW Worm Gear Reducer

### Ideal Applications

Industrial Automation • Precision Machinery • Power Transmission Systems

### Core Features

Variable Speed Control, High Torque Output, Continuous Adjustment, Efficient Transmission
