

# Stereo Microscope for Inspection

This stereo microscope is designed for detailed observation and inspection. It features adjustable magnification, dual eyepieces for comfortable viewing, and a stable stand for precise positioning.

## Overview

### Professional Inspection Capabilities

The XT Series stereo microscopes are engineered for precision observation and quality control tasks. Designed for industrial and professional use, these units offer adjustable magnification and a robust build to ensure stable performance. Dual eyepieces provide comfortable extended viewing, making them an essential tool for intricate three-dimensional inspection.

## Features

### Primary Features

- Adjustable magnification settings
- Dual eyepiece design for stereo viewing
- High-stability stand
- Ergonomic configuration for comfortable inspection

### Common Applications

Quality Control, Electronic Assembly, Material Inspection, Precision Manufacturing
