Overview

Precision Stereo Inspection

The SM series stereo microscope utilizes a dual parallel beam path optical system to deliver high-resolution, distortion-free images. Featuring a modular construction and an 8:1 zoom ratio, this instrument provides significant flexibility for diverse laboratory and industrial tasks. It is paired with a heavy-duty universal boom stand designed for maximum stability and adjustable viewing angles.

Optical Performance

Zoom Range	0.62 x
Zoom Ratio	8:1
Magnification	6.2x - 50x
Working Distance	80 mm
Dioptric Correction	+5 to -5

Mechanical Design

Base Dimensions	385 x 260 x 32 mm
Vertical Post Length	380 mm
Horizontal Arm Length	530 mm
Stand Features	Universal Arm, E-Arm, Extension Post Compatible, Lock Ring
