

Stick Welding Electrode Holder

This stick welding electrode holder is designed for secure and efficient stick welding. Its ergonomic handle offers comfort and reduces fatigue during extended use.

Product Overview

Germany-Style Electrode Holder

This Germany-style stick welding electrode holder is engineered for reliable performance in demanding welding environments. Featuring a robust construction with a combination of iron and brass materials, it ensures durability and efficient conductivity. The ergonomic design and secure clamping mechanism provide comfort and stability during extended welding operations.

Technical Specifications

Current Range

300 Amp

Minimum Current

500 Amp

Maximum Current

Weight

178 g

Construction & Materials

Material Composition

Component	Material
Upper Section	Iron
Lower Section	Brass
Handle	Nylon

Design Style

Germany Type
