

# Stone and Brick Cutting Saw

This stone and brick cutting saw is designed for precise and efficient cutting of various masonry materials. It features a robust frame for stability and an integrated water cooling system to minimize dust and extend blade life.

## ADDITIONAL IMAGES

## Product Overview

### Professional Masonry Cutting Solution

This high-performance stone and brick saw is engineered for precise, efficient cutting in demanding construction and renovation environments. It features a robust, stable frame design, a powerful motor, and an integrated water cooling system that significantly reduces dust while extending the service life of your blades. With an adjustable cutting table for accurate angle cuts and a built-in safety guard, it provides the reliability and precision required by professional contractors.

## Technical Specifications

### Performance Metrics

**350 mm**

Blade Diameter

**800 mm**

Cutting Length

### Blade Specifications

- Diameter: 350mm
- Thickness: 7mm
- Arbor Size: 25.4mm

### Model Identifiers

STM 350-800, GSL300

## Features & Safety

### Core Features

Wet Cutting System • Adjustable Cutting Table • Safety Guard • Dust Suppression
