## Product Overview

### Professional Stone Core Drill Bits

These laser-welded stone core drill bits are engineered for precision drilling in porcelain, artificial stone, and natural stone surfaces. Designed for wet application, they feature robust construction with a consistent segment height and thickness to ensure durability and clean cuts. With a variety of diameter sizes available, these bits are versatile tools for professional stone fabrication and installation projects.

## Technical Specifications

### Application Type

Wet Drilling

Segment Height	10 mm
Segment Thickness	3 mm
Tube Length	50 mm
Standard Connection	5/8"-11UNC
