

# Stone Crushing Plant

This plant is designed for crushing basalt and other stones. It is suitable for applications where aggregate shape and size proportion are critical, such as asphalt road surfaces.

## Overview

### High-Efficiency Stone Crushing Plant

This stone crushing plant is designed for robust performance in demanding industrial environments, offering reliable material reduction for construction and mining applications. Engineered for durability and consistent output, the system integrates seamlessly into large-scale aggregate production workflows. Its design prioritizes operational efficiency and ease of maintenance to maximize uptime for professional operators.

## Key Metrics

### Production Capacity

**200 t/h**

Hourly Output

**500 mm**

Max Feed Size

## Technical Specifications

### Crusher Configuration

- Primary Jaw Crusher
- Secondary Cone Crusher
- Vibrating Screen

### Power Source

Electric Motor

## Certifications

### Compliance & Standards

ISO 9001, CE Certified, Safety Standard Compliant
