

# Stone Impact Crusher

This impact crusher is designed for reducing stone and other materials in mining applications. It features a heavy-duty rotor and impact plates for high performance and long service life.

## ADDITIONAL IMAGES

## Overview

### High-Performance Stone Impact Crusher

This robust impact crusher is engineered for efficient size reduction of stone and mineral materials in mining and construction environments. Featuring heavy-duty construction and a high-speed rotor design, it delivers consistent particle size distribution and high throughput. The unit is designed with adjustable discharge settings and easily replaceable wear parts to maximize operational uptime and simplify maintenance.

## Key Features

### Warranty

2 Year Warranty

## Technical Specifications

### Technical Data Matrix

Model	Rotor (mm)	Max Feed (mm)	Capacity (t/h)	Power (kW)	Weight (kg)
PF-1007	1000x700	300	20-35	37-55	9500
PF-1010	1000x1050	350	5-20	55-75	12127
PF-1210	1250x1050	350	16-65	110-132	14000
PF-1214	1250x1400	350	45-100	132-160	—

### Mechanism

Impact Crushing, Adjustable Discharge, High-Speed Rotor
