Product Overview

Professional Stone Handling Solution

This industrial-grade scissor clamp lifter is engineered for the safe and efficient transport of natural and engineered stone slabs, including granite, marble, quartz, and onyx. Featuring an automatic locking mechanism and rubber-coated contact surfaces, it ensures maximum safety by maintaining a secure vertical grip. The unit is versatile, compatible with forklifts, jib cranes, and overhead crane systems for use in diverse industrial environments.

Technical Specifications

A Model Max Capacity	1800 kg
Jaw Opening Range	180mm - 360mm
S Model Max Capacity	300 kg

Design Features

Compatible Equipment

- Forklift boom
- Jib crane
- Overhead crane

Surface Coating	Galvanized
Key Features	Rubber Coated Jaws, Return Spring, Automatic Locking, Swivel Eye, Bow Shackle
