

Stone Splitting Wedges

These forged steel wedges are used for splitting stone and concrete. They are ideal for demolition, construction, and quarrying applications.

Product Overview

High-Efficiency Stone Splitting Tools

These professional-grade stone splitting wedges are engineered for demanding applications in mining, construction, and demolition. Designed for optimal performance, these tools offer high efficiency and a lightweight construction that reduces operator fatigue. They are essential for tasks ranging from geological prospecting and foundation engineering to concrete and asphalt surface breaking.

Applications

Primary Applications

Mining, Construction Demolition, Geological Prospecting, Foundation Engineering, Cement Road Breaking, Asphalt Surface Splitting, Fire Rescue

Performance Features

Key Benefits

- High efficiency performance
- Lightweight design for easy handling
- Versatile for various rock and concrete breaking tasks

Product Components

Component Types

Feather and Wedge Sets • Multi-wedge Splitting Tools • Forged Steel Construction
