

Storage Box Mould

This precision-engineered mould is designed for manufacturing storage boxes. Constructed from high-grade steel, the mould ensures durability and consistent production.

Overview

Precision Storage Box Moulding Solution

This precision-engineered mould is specifically designed for the high-volume manufacturing of storage boxes. Constructed from high-grade steel, it ensures exceptional durability and consistent production quality over extended operational lifecycles. The design incorporates advanced features such as optimized cooling channels for rapid cycle times and robust ejection mechanisms to guarantee smooth, reliable part removal.

Technical Specifications

Available Model Variants

- Storage Box Mould 353
- Storage Box Mould 354
- Storage Box Mould 355
- Storage Box Mould 356
- Storage Box Mould 357
- Storage Box Mould 358

Construction Material

High-grade steel

Performance Features

Key Features

High-volume production, Precision cavity dimensions, Efficient cooling channels, Robust ejection mechanism
