Product Overview

Professional Fire Hose Storz Coupling

These Storz couplings are designed for high-performance firefighting operations, providing a secure, leak-proof connection for water delivery equipment. Engineered with a symmetrical, interlocking lug design, they facilitate rapid deployment and reliable performance under pressure. Constructed from durable, lightweight alloys, these fittings offer excellent corrosion resistance and long-term durability in demanding industrial and emergency service environments.

Technical Details

Key Features

- Symmetrical orientation design
- Interlocking hook-lug mechanism
- Watertight integrated rubber seal
- Corrosion-resistant construction

Coupling Type	Storz (Symmetrical)
Material	Lightweight Aluminum Alloy
Nominal Size	2.5 inch

Applications

Typical Applications	Fire Departments, Industrial Facilities, Emergency Services, Fire Suppression Systems
