

Stovetop Water Kettle

This stovetop water kettle is designed for heating water on various stovetops. It features a curved body, a spout with a lever mechanism, and is available in stainless steel and yellow.

Product Overview

Classic Stovetop Design

This stovetop water kettle combines timeless aesthetics with practical functionality for daily kitchen use. Available in both a polished stainless steel finish and a vibrant matte yellow, it serves as an elegant addition to any stovetop. The design features a curved body, a heat-resistant handle, and a convenient spout with a lever mechanism for controlled pouring.
