

Straight Aviation Tin Snips

These straight snip cutters, also known as aviation tin snips, are designed for cutting sheet metal. They feature yellow handles and a locking mechanism to keep the blades closed when not in use.

Product Overview

Professional Aviation Tin Snips

These 10-inch aviation tin snips are engineered for precision cutting of sheet metal. Featuring durable construction and a reliable locking mechanism, they ensure safety and convenience during storage. Designed for non-insulated manual tasks, these tools provide a sturdy grip and consistent performance in professional metalworking applications.
