

Straight Silicone Reducer Hose Connector

This straight silicone reducer hose connects components of different sizes. Constructed from multi-layered reinforced silicone, it offers excellent resistance to heat, pressure, and chemicals.

Product Overview

Professional Grade Silicone Reducer

This high-performance straight silicone reducer hose is engineered for demanding automotive applications including cooling systems, turbocharger setups, and air intakes. Constructed from multi-layered reinforced silicone, the hose provides superior resistance to extreme temperatures, pressure, and chemical exposure. Its design facilitates the reliable connection of components with varying diameters, ensuring optimal flow and structural integrity under vacuum conditions.

Technical Specifications

Performance Features

- Multi-layered reinforcement for high pressure
- Smooth inner bore for optimal flow
- Excellent heat and chemical resistance
- Anti-collapse design for vacuum environments

Material Characteristics

High-Grade Silicone • Reinforced Structure • Flexible • Durable

Ideal Applications

Cooling Systems, Turbocharger Systems, Air Intake Systems
