

Stranded Copper Conductor PVC Welding Cable

This welding cable features a stranded copper conductor and PVC insulation. It is suitable for welding machines or similar equipment and comes in various sizes and voltage ratings.

Product Overview

Professional-Grade Welding Cable

This high-performance welding cable features a stranded copper conductor designed for optimal flexibility and conductivity. Encased in durable PVC insulation, it is engineered for consistent performance in welding machines and heavy-duty electrical equipment. The cable meets international standards, ensuring reliability for industrial applications.

Technical Standards

Core Color Coding

Orange • Grey

Compliance

IEC 60245-6

Specifications Table

Cable Dimensions and Weight

Nominal Area (mm ²)	Structure	Approx. Dia. (mm)	Approx. Weight (Kg/km)
10	227/0.5	6.8	195
16	355/0.5	7.8	285
25	507/0.5	9.5	477
35	722/0.5	10.8	665
50	1050/0.5	12.5	940
70	1395/0.5	14.5	1360
95	1900/0.5	16.5	1861
120	2370/0.5	18.5	2328
150	2964/0.5	20.5	2916
