

Striking Face Open Wrench

This striking open wrench is designed for applying high torque to fasteners. Its open-end design allows access to fasteners in confined spaces, while the striking face enables use with a hammer or mallet.

Product Overview

Heavy-Duty Performance

This striking face open wrench is engineered for high-torque applications where maximum force is required. The durable steel alloy construction ensures longevity under industrial conditions, allowing for the loosening of stubborn nuts and bolts when used with a hammer or mallet. Its open-end design provides excellent access in tight spaces, making it an essential tool for automotive, industrial, and construction maintenance.

Technical Specifications

Dimensions and Weight Matrix

Model	Size (S)	Length (L)	Weight (g)
5106-17	17	25	85
5106-19	19	125	80
5106-22	22	135	95
5106-24	24	150	135
5106-27	27	175	230
5106-30	30	190	260
5106-32	32	190	260
5106-36	36	200	370
