Product Overview

Versatile Submersible Solution

This compact and efficient submersible pump is engineered for reliable water circulation in both freshwater and saltwater environments. Featuring a brushless, permanent magnetic drive, it ensures long-term performance and low-noise operation. With a 200L/H flow rate and a 1.6m maximum head, it is the ideal solution for aquariums and small water feature applications.

Technical Specifications

Key Performance Metrics

200 L/H

Flow Rate

1.6 m

Max Head

4.8 W

Power Consumption

Electrical Data

Parameter	Value
Rated Voltage	12V DC
Max Rated Current	0.4A
Noise Level	<35dB

Operation & Durability

Operating Conditions

- Submersible installation
- Suitable for fresh and salt water
- Max working temperature: 60 Celsius
- Dry run and blocking protection available (optional)

Compatible Power Sources

Solar Panel • DC Electric Source • Adapter • Battery

Durability and Materials

ABS Material, Brushless Motor, IP68 Waterproof, 30,000+ Hours Lifespan
