

# Submersible Bilge Pump for Boats

This submersible bilge pump is designed for removing water from boat bilges. It features a durable plastic housing with a strainer base to prevent debris from entering the pump and includes a hose barb outlet for easy connection to discharge plumbing.

## Product Overview

### High-Efficiency Marine Bilge Pump

The WWB-0710 submersible bilge pump is engineered for reliable water removal in marine environments. Featuring a robust plastic housing and an integrated strainer base, it effectively prevents debris from clogging the mechanism. This unit is designed for easy integration, utilizing a standard hose barb outlet for quick connection to existing discharge plumbing.

## Technical Specifications

Power Source	DC
Voltage	12 V
Rated Current	3 A
Recommended Fuse	5 A

## Construction & Design

### Installation Features

- Submersible design
- Hose barb outlet

Construction Materials	Durable Plastic Housing, Integrated Strainer Base
