

Submersible Bilge Pump with Float Switch

This submersible bilge pump is designed for removing water from boat bilges and other marine applications. It features a durable plastic housing, efficient motor, and automatic float switch for unattended operation.

Product Overview

Professional Marine Bilge Pump

The WWB-0620 is a high-performance submersible bilge pump engineered specifically for efficient water removal in marine environments. It features a durable, compact plastic housing designed for seamless installation in confined boat spaces. Equipped with an integrated automatic float switch, this unit provides reliable, unattended pumping operation to keep your vessel dry.
