

Submersible Bilge Pump

This submersible bilge pump is designed for effective water removal in marine and other applications. The pump features durable construction for long-lasting performance and is suitable for boats, basements, and areas where water accumulates.

Product Overview

Efficient Water Removal Solution

The BL-25 is a robust, submersible bilge pump engineered for effective water removal in marine vessels, basements, and other areas prone to water accumulation. Its compact design allows for seamless installation in tight spaces without sacrificing performance. Equipped with an integrated float switch, the unit ensures automatic operation, providing reliable maintenance of water levels in demanding environments.

Technical Specifications

Operation

Automatic • Float Switch Controlled

Model	BL-25
Pump Type	Submersible

Key Features

Suitable Applications

- Marine vessels
- Basements
- Flood-prone areas
- General water accumulation

Design Advantages	Compact, Durable Construction, Easy Installation, High Performance
