

# Submersible Borehole Pump for Deep Wells

This submersible borehole pump is designed for water supply from wells or reservoirs. It is suitable for domestic use, civil and industrial applications, and garden and irrigation purposes.

## Product Overview

### High-Performance Submersible Borehole Pump

This submersible borehole pump is engineered for efficient water supply from deep wells and reservoirs, making it suitable for a wide range of domestic, civil, and industrial applications. Designed for reliability, it supports various irrigation and drainage needs while maintaining consistent performance. The unit features a rewindable motor and is compatible with both single-phase and three-phase power supplies, ensuring versatility across different installation environments.

## Operating Conditions

Maximum Fluid Temperature	40
Maximum Sand Content	0.15 %
Maximum Immersion Depth	50 m

## Technical Specifications

### Minimum Well Diameter

Series	Min. Diameter
3NK	3 inches
4NK	4 inches

### Power Configuration

- Single-phase: 220V - 240V/50HZ
- Three-phase: 380V - 415V/50HZ

### Certifications & Standards

ISO 9906, CE, RoHS, GS, ISO 9001, CCC

## Features & Options

### Warranty

**2 Years**

Warranty Period

### Customization Options

Special mechanical seal • 60 Hz frequency • Other voltages • Built-in capacitor
