

Submersible Deep Well Centrifugal Pump

This submersible pump is engineered for effective water removal. Constructed from stainless steel, it is designed for use in deep well applications.

Overview

Submersible Deep Well Centrifugal Pump

This high-performance submersible centrifugal pump is engineered specifically for deep well water extraction. Constructed from durable stainless steel, the unit ensures longevity and reliability even in demanding environments. Its design features a robust cylindrical body with a dedicated intake section and a protected motor housing, making it an ideal solution for professional water management applications.

Technical Specifications

Design Features

- Cylindrical multi-section body
- Perforated intake section
- Base-mounted motor housing

Construction Material	Stainless Steel
Application	Deep Well, Water Extraction, Submersible
