

Submersible Deep Well Water Pump

This submersible deep well water pump is designed for efficient water extraction. It is constructed with durable materials and features a multi-stage impeller system for high head and flow capabilities.

Product Overview

High-Performance Deep Well Extraction

The 4SP3 is a robust submersible deep well water pump engineered for reliable water extraction in demanding environments. Featuring a multi-stage impeller system, it delivers high head and flow capabilities suitable for irrigation, domestic water supply, and industrial applications. Its corrosion-resistant construction ensures long-lasting operation and consistent pressure, providing a cost-effective solution for deep well needs.

Technical Specifications

Installation Requirements

- Use copper conductors only
- Refer to instruction manual before installing or operating
- Do not use an extension cord
- Ensure proper grounding (do not remove grounding prong)

Motor Type	Single Phase
------------	--------------

Safety & Compliance

Safety Warnings	Disconnect power before servicing, Do not run dry, No flammable fluids, No explosive fluids
Country of Origin	China
