

Submersible Deep Well Water Pump - Stainless Steel

Submersible deep well pump designed for efficient water extraction. Features durable stainless steel construction for corrosion resistance and long-lasting performance.

Product Overview

High-Performance Submersible Deep Well Pump

This submersible deep well water pump is engineered for efficient water extraction from deep wells, featuring a robust stainless steel construction for superior corrosion resistance. Designed to handle demanding environments, it offers reliable performance for irrigation, domestic water supply, and industrial applications. Its durable build ensures long-lasting operation, while the design facilitates straightforward installation and maintenance.

Operating Limits

| | |
|-------------------------|-----------|
| Fluid pH Range | 6.5 - 8.5 |
| Fluid Temperature Limit | 40 °C |
| Max Ambient Temperature | 75 °C |
| Max Operating Depth | 50 m |

Technical Specifications

| | |
|-----------------------------|-------------------|
| Insulation Class Class I | |
| Protection Class IP68 | |
| Compatibility | Under 100mm wells |
| Construction Material | Stainless Steel |
