

Submersible Deep Well Water Pump - Stainless Steel

This submersible deep well water pump is designed for efficient water extraction from deep wells. Constructed with durable stainless steel, it ensures long-lasting performance and resistance to corrosion.

Overview

High-Performance Submersible Deep Well Pump

This submersible deep well water pump is engineered for efficient water extraction from deep wells using a high-efficiency motor to reduce energy consumption. Constructed with durable stainless steel, the unit ensures long-lasting performance and superior resistance to corrosion in demanding environments. Its compact design is specifically optimized for easy installation within narrow well casings, making it a versatile choice for professional water management.

Key Features

Performance Highlights

1 High Motor Efficiency	1 SS Corrosion Resistance
-----------------------------------	-------------------------------------

Technical Specifications

Water Type

Clean Water

Material

Stainless Steel

Installation

Submersible / Narrow Well Casing

Applications

Recommended Applications

- Irrigation
- Domestic water supply
- Industrial uses

Performance

Operational Benefits

Energy Efficient, Consistent Pressure, Reliable Flow, Corrosion Resistant
