

Submersible Drainage Pump with Float Switch

This submersible pump is designed for efficient drainage and irrigation. It features a robust construction with a stainless steel body and a durable motor, and is equipped with a float switch for automatic operation.

Product Overview

Professional Submersible Drainage Solution

This high-performance submersible water pump is specifically engineered for effective drainage and irrigation in demanding environments. Featuring a rugged stainless steel body and a high-durability motor, it ensures long-term operational reliability. The integrated float switch allows for fully automatic water level control, making it an essential tool for construction sites, residential basements, and agricultural applications.

Technical Specifications

Key Performance Metrics

1 HP

Horsepower

Recommended Use Cases

- Construction site drainage
- Basement water removal
- Agricultural irrigation

Design Features

Submersible, Automatic Float Switch, Stainless Steel Housing, Drainage-Ready
