

Submersible Pump Winding Wire

Winding wires designed for submersible pump applications. They are available in over 100 sizes with polyethylene, cross-linked polyethylene, cross-linked polyolefin, and high-temperature insulation types.

Product Overview

Submersible Pump Winding Wires

These professional-grade winding wires are specifically engineered for the stator windings of submersible pumps, offering reliable performance in harsh aquatic environments. The series includes diverse insulation materials capable of operating at temperatures ranging from 70 to 150 . With over 100 available sizes and multiple strand configurations, these wires ensure compatibility and durability for various high-efficiency pump designs.

Available Variants	100 sizes
--------------------	-----------

Technical Specifications

Wire Strand Configurations

Configuration	Diameter Range
Single strand	∅0.6/1 - ∅3.8/1
Multi strand (7)	∅0.75/7 - ∅1.12/7
Multi strand (19)	∅0.63/19 - ∅1.5/19

Insulation Material Options	Polyethylene (70), Cross-linked polyethylene (90), Cross-linked polyolefin (125), High-temperature (150)
-----------------------------	--------------------------------------------------------------------------------------------------------------
