

Submersible Sewage Pump

This submersible sewage pump is designed for effective wastewater management. Its robust construction ensures durability and a long service life, suitable for handling sewage, drainage, and effluent in various applications.

Product Overview

Industrial Submersible Sewage Pump

This submersible sewage pump is engineered for heavy-duty industrial, agricultural, and construction applications. Designed to effectively transport slurry, mortar, and sewage containing solid particles like paper scraps and mud, it offers exceptional reliability in challenging environments. The robust design ensures smooth operation in wastewater management and dredging tasks.

Operating Limits

pH Range	4-10
Max Operating Depth	5 m
Fluid Temperature Limit	40 °C
Max Ambient Temperature	40 °C

Technical Specifications

Insulation Class
Class E

Protection Class
IPX8

Applications

Ideal Applications

- Industrial sewage handling
- Agricultural drainage
- Mining slurry transport
- Building construction
- Dredging
- Daily sanitary wastewater

Certifications

Standards	CE
