

Submersible Sewage Pump for Wastewater Drainage

This submersible sewage pump is designed for wastewater drainage in factories and construction sites. It is also used in municipal sewage treatment plants and residential drainage stations.

Product Overview

Submersible Wastewater Pump

This high-performance submersible sewage pump is engineered for efficient wastewater drainage in diverse commercial and municipal applications. Built with a robust motor featuring copper windings and an integrated thermal protector, it ensures reliable operation in demanding environments. The pump is designed for versatility, suitable for everything from industrial construction sites to agricultural field irrigation.

Technical Specifications

Max Immersion Depth	5 m
Max Liquid Temperature	40 °C
Liquid pH Value	4-10
Max Liquid Density	1.2 kg/m ³

Motor & Electrical

Motor Features

- Copper winding
- Built-in thermal protector
- Stainless steel welded shaft

Insulation Class	F
------------------	---

Certifications

Compliance Badges

ISO 9001 • RoHS

Applications

Primary Applications	Wastewater drainage, Construction sites, Municipal sewage treatment, Agricultural irrigation, Commercial facilities
----------------------	---
